GENESIS METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements
For the Three Months Ended June 30, 2021 and 2020
(Expressed in Canadian Dollars)

1. Nature of operations and going concern

Genesis Metals Corp. (the “Company” or “Genesis”) was incorporated under the Business Corporations Act of British Columbia on April 26, 2010 and its principal activity is the acquisition and exploration of mineral property interests in Canada. The head office of the Company is located at #1020-800 West Pender Street, Vancouver, BC.

These financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and settle its obligations in the normal course of business.

The recoverability of the amounts shown for mineral property interests is ultimately dependent upon the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the mineral properties, obtaining necessary financing to explore and develop the mineral properties, entering into agreements with others to explore and develop the mineral properties, and upon future profitable production or proceeds from disposition of the mineral properties. The amounts shown as mineral properties represent acquisition costs incurred to date, less amounts recovered from third parties and impairment charges, and do not necessarily represent present or future values.

The Company’s ability to continue operations is uncertain and is dependent upon the ability of the Company to obtain necessary financing to meet its liabilities and commitments as they become payable, and the ability to generate future profitable production or operations or sufficient proceeds from the disposition thereof. The outcome of these matters cannot be predicted at this time. These material uncertainties may cast significant doubt about the Company’s ability to continue as a going concern.

These condensed interim consolidated financial statements do not reflect adjustments, which could be material to the carrying values and classification of assets and liabilities, which may be required should the Company be unable to continue as a going concern.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, have negatively affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. To date, there have been no adverse effects on the Company’s business or ability to raise funds.

2. Basis of preparation and statement of compliance

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) for interim information, specifically International Accounting Standards (“IAS”) 34 - Interim Financial Reporting. In addition, these condensed interim consolidated financial statements have been prepared using interpretations issued by the International Financial Reporting Interpretation Committee (“IFRIC”) in effect at June 30, 2021 and the same accounting policies and methods of their application as the most recent annual financial statements of the Company. These condensed interim consolidated financial statements do not include all disclosures normally provided in the annual financial statements and should be read in conjunction with the Company’s audited financial statements for the year ended March 31, 2021.

In management’s opinion, all adjustments necessary for fair presentation have been included in these condensed interim consolidated financial statements. Interim results are not necessarily indicative of the results expected for the year ending March 31, 2022.

GENESIS METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements
For the Three Months Ended June 30, 2021 and 2020
(Expressed in Canadian Dollars)

These consolidated financial statements have been prepared on a historical cost basis, except for financial instruments classified as fair value through profit or loss, which are stated at their fair value. All dollar amounts presented are in Canadian dollars unless otherwise specified. In addition, the consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information. Unless otherwise stated, amounts are expressed in Canadian dollars.

3. Significant accounting policies

(a) Principles of consolidation

These consolidated financial statements include the accounts of the Company and its wholly-owned Canadian subsidiary, Chevrier Metals Corp. All intercompany transactions and balances have been eliminated upon consolidation.

(b) Use of estimates and judgements

The preparation of these financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, and income and expenses. Although management uses historical experience and its best knowledge of the amount, events or actions to form the basis for judgements and estimates, actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods. The most significant accounts that require estimates as the basis for determining the stated amounts include recoverability and impairment of mineral property interests, and valuation of share-based payments.

Significant assumptions and critical estimates exercised in applying accounting policies relate to, but are not limited to, the following:

- The carrying value and the recoverability of mineral property interests, which are included in the statements of financial position;
- The application of the inputs used in accounting for share-based compensation expense which is included in profit or loss. These estimates are derived using the Black-Scholes option pricing model or are based on the value of comparable goods and services. Inputs are determined using readily available market data.

The significant judgments, estimates and assumptions made by management in applying the Company's accounting policies were the same as those that applied to the Company's consolidated financial statements for the year ended March 31, 2021.

4. Exploration and evaluation assets and expenditures

Exploration and Evaluation Assets

The balance of exploration and evaluation assets consist of the following:

		Chevrier Gold Project, Quebec
Balance, March 31, 2021	\$	1,492,368
Additions		-
Balance, June 30, 2021	\$	1,492,368

GENESIS METALS CORP.

Notes to the Condensed Interim Consolidated Financial Statements
For the Three Months Ended June 30, 2021 and 2020
(Expressed in Canadian Dollars)

(a) Chevrier Gold Project, Quebec

During the year ended March 31, 2016, the Company acquired a 100% interest in the Chevrier Gold Property for total consideration of \$1,096,197. The Chevrier Gold Property consists of various contiguous mining claims, some of which are subject to royalties ranging from 7.5% - 10% on net profits of production and 0.5%-1% on the net smelter return royalties (“NSR”).

In 2017, the Company additionally acquired 100% right, title, and interest in and to certain mineral claims on the Chevrier Property from Doctors Investment Group Ltd (“Doctors”) by issuing 300,000 shares with a fair value of \$270,000 to Doctors and paying \$25,000 in claim acquisition costs. Doctors retained a 1% NSR, subject to the right of the Company to purchase 0.5% of the NSR for \$750,000, thereby reducing the NSR to 0.5%.

In February 2017, the Company consolidated its land position at Chevrier by acquiring a 100% interest in the Hygrade Property from Les Ressources Tectonic Inc. (“Tectonic”). The Hygrade Property is located within the boundaries of the Company’s Chevrier Gold Project. The Company made a cash payment of \$25,000, issued 33,333 common shares to Tectonic with a fair value of \$25,833, and granted a 2% NSR to Tectonic, which may be decreased to 1% at any time by paying Tectonic the sum of \$1,500,000.

During the year ended March 31, 2019, the Company expanded its Chevrier Gold Project land position by acquiring another block of mineral claims, known as the Trenholme Property, from Tectonic. The Company made a cash payment of \$15,000 and issued 40,000 shares to Tectonic with a fair value of \$16,000. Tectonic retained a 2% NSR, subject to the Company’s right to reduce it by 1% for \$1,000,000 cash payment.

During the year ended March 31, 2020, the Company made payments to the Quebec Ministry of Energy and Natural Resources to acquire additional claims expanding the Chevrier Gold Property. There have been no additional claim acquisitions during the year ended March 31, 2021 and the three months ended June 30, 2021.

(b) October Gold, Ontario

In 2011, the Company entered into an option agreement, subsequently amended, to acquire a 100% interest in mineral rights to the October Gold property located within the Abitibi belt in Ontario. Upon exercise of the option, the Optionors are entitled to a 3.0% NSR of which 2.0% can be repurchased by the Company on payment of \$500,000 for each 1% NSR. The Company has made all the necessary payments for the optioned property, but not all the claims have been officially transferred in the Company’s name yet. The Company is currently in the process of completing the official transfer of the remaining claims into the Company’s name.

During fiscal 2017, the Company wrote off the property. However, the Company resumed work on this property during the year ended March 31, 2021.

(d) Share-based payments:

The Company has a share purchase option plan whereby the Board of Directors may, from time to time, grant options to directors, officers, employees or consultants. Options granted have a maximum exercise timeline of ten years from date of grant or such lesser period as determined by the board of directors. The exercise price of an option is not less than the closing price on the TSX Venture Exchange on the last trading day preceding the grant date. Under the plan the Company is authorized to grant stock options of up to ten percent (10%) of the number of common shares issued and outstanding.

10. Financial instruments

The three levels of the fair value hierarchy are described below:

- Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2: Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability.
- Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The carrying values of cash, receivables, accounts payable and accrued liabilities, and due to related parties approximate their fair values due to their short terms to maturity.

Financial instrument risk exposure and risk management:

(i) Credit risk:

Credit risk arises from the possibility that counterparties may be unable to fulfill their commitments to the Company. The Company's credit risk is primarily attributable to cash and receivables. The carrying value of these instruments represents the Company's maximum exposure to credit risk. The Company manages and limits exposure to credit risk by maintaining its cash with high-credit quality financial institutions. The Company's cash is held through large Canadian financial institutions and receivables mainly consist of taxes receivable from the Government of Canada (Goods and Services Tax) and the province of Quebec (Quebec Sales Tax). Management believes that the credit risk related to its cash and receivables is low.

(ii) Liquidity risk:

Liquidity risk is the risk that the Company cannot meet its financial obligations associated with financial liabilities in full. The Company manages liquidity risk through the management of its capital structure, as outlined in Note 12 of these financial statements. As at June 30, 2021 the Company had a working capital of \$2,306,586. The Company is dependent on obtaining regular financings in order to continue as a going concern. Despite previous success in acquiring these financings, there is no guarantee of obtaining future financings. The Company is exposed to liquidity risk.

(iii) Market risk:

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's interest-bearing financial assets are comprised of cash which bears interest at fixed or variable rates. The Company is not exposed to material interest rate risk.

Foreign currency risk

The Company operates in Canada and is not exposed to any significant foreign currency risk.

Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on profit or loss and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of resources, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

11. Capital management

The Company's objectives when managing capital are:

- To maintain and safeguard its accumulated capital in order to provide an adequate return to shareholders by maintaining a sufficient level of funds to support continued evaluation and maintenance at the Company's existing properties, and to acquire, explore, and develop other mineral properties.
- To invest cash in demand deposits with high credit quality issuers, thereby minimizing the risk and loss of principal.
- To obtain the necessary financing to complete exploration, if and when it is required.

In the management of capital, the Company includes shareholders' equity in the definition of capital. The Company is not subject to externally imposed capital requirements. The Company manages the capital structure and makes adjustments to it, based on the level of funds required to manage its operations in light of changes in economic conditions and the risk characteristics of its underlying assets. In order to maximize ongoing operations, the Company does not pay dividends. Notwithstanding the risks described in Note 1 of the financial statements, the Company expects to continue to raise funds, from time to time, to continue meeting its capital management objectives. There were no changes to management approach to capital management during the three months ended June 30, 2021.

12. Segmented information

The Company operates in one reportable segment, being the acquisition and exploration of mineral projects. All of the Company's non-current assets and operations are within the mineral exploration sector in Canada.

13. Subsequent events

Subsequent to the period ended June 30, 2021, the following events took place:

- A total of 150,000 common share purchase options were granted to a consultant, exercisable at a price of \$0.24 for a period of five years.
- A total of 319,000 stock options were forfeited.
